Over 45 years ago, University of Texas football star, Freddie Steinmark, deeply moved many Americans, including President Nixon. His poignant journey, originally recounted in the widely-read *Freddie Steinmark: Faith, Family, Football* (University of Texas Press), delves into his life after the National Championship game victory in 1969. Diagnosed with osteosarcoma, Freddie underwent an urgent leg amputation. His valiant fight against cancer not only captivated the nation but also changed the discourse about the disease. Featuring a narration by the co-author and Freddie’s friend, Bower Yousse, with Freddie’s statements and thoughts voiced by his young brother Sammy Steinmark, collectively this presents a truly immersive audiobook, where this fresh rendition promises to reconnect audiences with Freddie's inspiring legacy and his profound impact on the nation's "War on Cancer.”
